ABSTRACT

kzhbgvadghtbdkgtkj

Keywords: Keyword1, Keyword2

1 INTRODUCTION

Marine reserves can help tourism (Viana et al., 2017). Pero Aceves-Bueno et al. (2017) dice que el tamaño del TURF importa. Costello et al. (2016) dice que arreglemos las pesquerías.

$$a = b \quad (1)$$

2 MATERIALS AND METHODS

We use Eq 2 to run our analysis.

$$y = mx + b \quad (2)$$

3 RESULTS

We use Eq 2 to get Figure 1.

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```

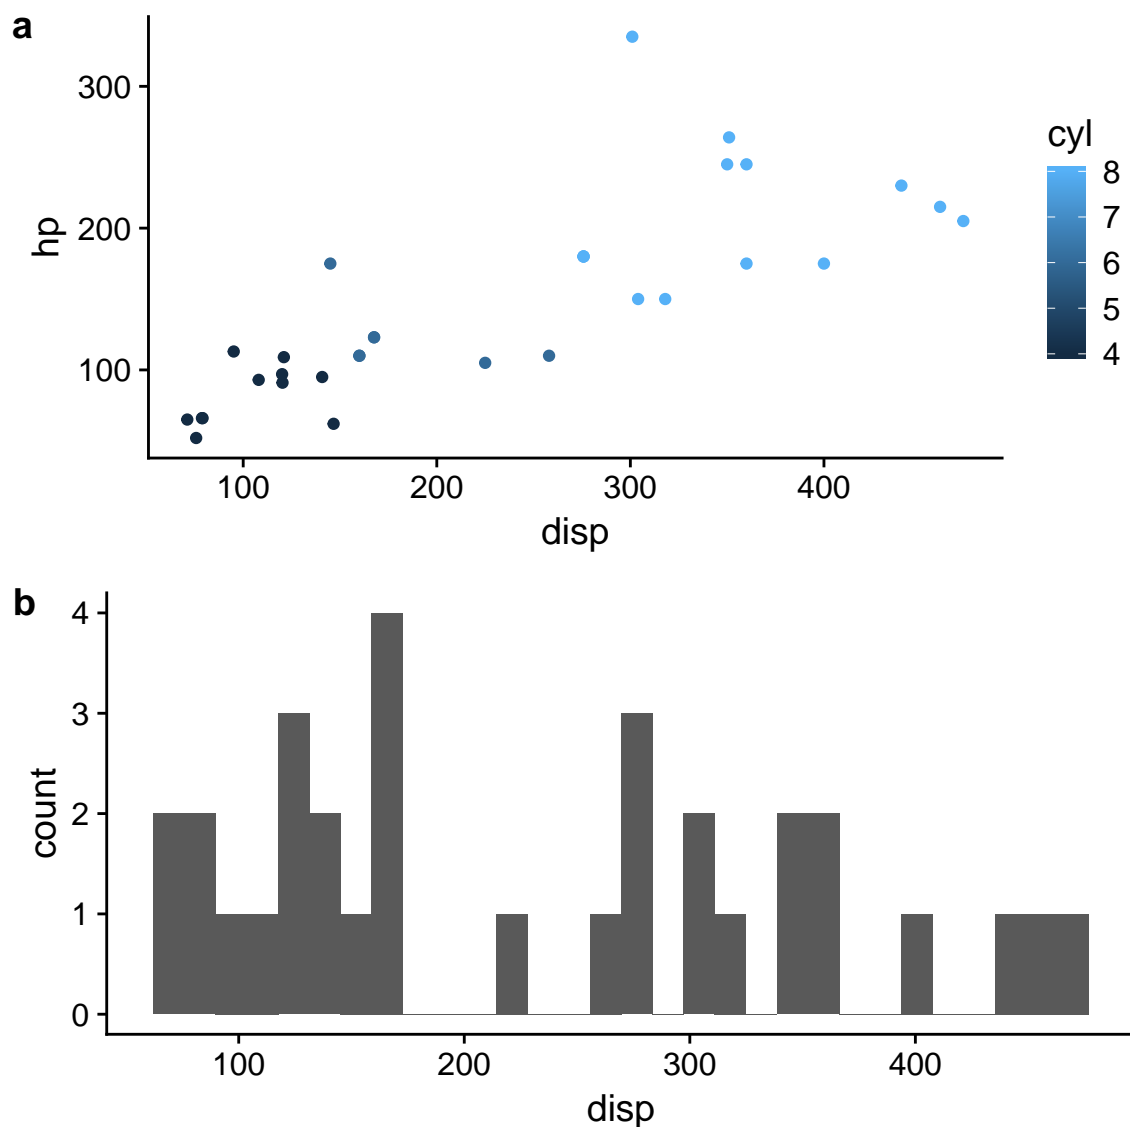

Figure 1. Displacement as a function of hp (a), and a histogram of displacement (b)

4 DISCUSION AND CONCLUSION
